MARCH 2023 USDA LIVESTOCK REPORTS

HOGS AND PIGS REPORT – THURSDAY MARCH 30, 2023 2:00PM CST

First notice day is April 10th and Monday Live Cattle traded higher with April settling at \$164.90 with the 5 day steer price average at \$164.54.

For the coming week cash cattle prices are likely to be steady to possibly weaker. Of course if boxed beef has a surge to the upside, that's another story but boxed beef has been going down and could continue to drop as consumers are shying away from the expensive cuts.

ADMIS.com | 312.242.7000 | Chicago | New York | London | Hong Kong | Singapore | Taipei | Shanghai

Packers will be buying this week for cattle delivered next week, the first week of April and will be pulling in their own cattle and contracted cattle. Last week's slaughter was light at 626,000, down 5000 head from the previous week. Cattle were also lighter at least cattle bought on the showlists. This week will also be a lighter slaughter. Packers will be killing on Friday, Good Friday, but as usually is the case on Easter weekend, there will be fewer people showing up. Saturday, slaughter should be very light.

Last week cash cattle markets were over Wednesday with packers buying a few to finish on Thursday. Cash prices were steady with a week ago, but there were more cattle in the Southwest sold \$1.00 lower compared to last week. Packers are buying fewer showlist cattle in Texas, Oklahoma and New Mexico and likely due to more feedlots moving to some form of various packer contracts and packer feeding programs versus selling on the showlist.

Cash cattle prices in the Midwest sold from 163.50 - 165.50 with a few Thursday on delivered cattle up to \$167.50. Dressed steers were 263.00 - 265.00. Cattle in the Southwest 163.00 to \$164.00 with dressed prices at 258.00 in Kansas. Although it isn't a big difference, buyers are buying the two regions about \$2.00 lower for Southwest cattle.

China is increasing dairy, cattle, goats, poultry and aquaculture. An interesting report

BEEF EXPORTS FOR WEEK ENDING MARCH 16, 2023

Beef net export sales were 18,600 MT for week ending March 16, 2023. Up from a week ago but still running lower than the needed weekly average. Still no big change from China that took just 1500MT. South Korea took 10,800 MT followed by Japan at 3600 MT. Japan over the past two years has increased buying beef from Brazil/

Week ending March 9, 2024 beef net sales were 17,700 MT.

Week ending March 2, 2023 beef net sales were 5,600 MT.

Week ending February 23, 2023 beef net sales were 8,100 MT.

Week ending February 16, 2023 beef net sales were 15,400 MT.

Week ending February 9, 2023, beef net sales were 28,100 MT.

ADMIS.com | 312.242.7000 | Chicago | New York | London | Hong Kong | Singapore | Taipei | Shanghai

As of March 28, 2023 U.S. year to date hog slaughter was up 2.6%.

DECEMBER 2022 HOGS AND PIGS REPORT

	Ranges	Average	ACTUAL
Farrowings			
September-November	97.5-99	98.3	99
Farrowing intentions			
December-February	99.4-100.5	99.8	101
March-May	98.2-100.9	99.9	100

The kill so far is higher than what the September – November farrowing estimated and appears to be larger than intentions. During January 2023 hog imports from Canada were 559,685 head, up 45,089 from January a year ago. Hog imports are not the total reason for larger slaughter in 2023.

Maybe the March 30, 2023 numbers could be higher than estimates?

Lean hog futures were higher Monday on light trade volume indicating traders are liquidating. The oversold condition has now changed. Thursday, March 23rd, the RSI was 19.45% for June 2023 Lean Hogs. Monday March 27th it was 40.17%. Trade volume this week is likely to be light. Funds are reallocating and will wait until April to balance accounts and make changes to any that have baskets and fundamental traders will wait to establish positions after the Hogs and Pigs report on March 30th.

The pork carcass was up \$4.42 on early sales Monday as loins jumped \$22.57 and Pics were up \$4.22. However it's not something that will excite the market unless there is continued higher prices and more importantly if loins and hams turn higher. Loins were down early \$1.86 and hams were up \$2.17 essentially crossing out the other.
